Leçon :Interferometrie à division d'amplitude

Gabriel Le Doudic

Préparation à l'agrégation de Rennes

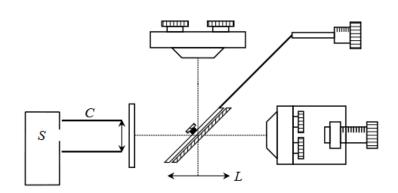

14 mai 2023

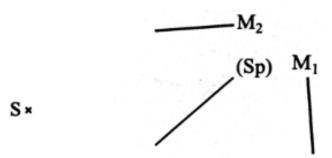

Niveau : CPGE première année **Prérequis** : Optique géométrique

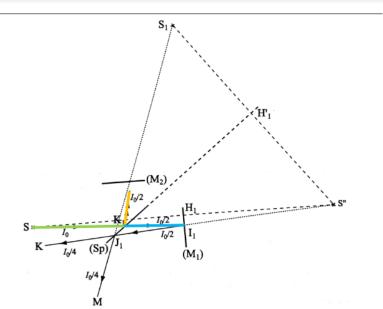

: Notion de cohérence, calcul de différence de marche

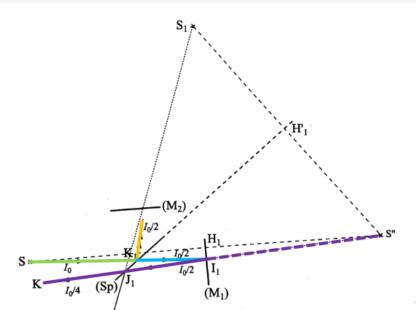

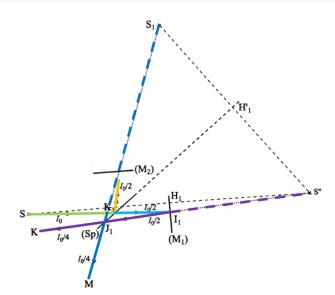

- Principe de l'interférométrie
 - Limites de la division du front d'onde
 - Franges d'égales inclinaison
 - Frange d'égale épaisseur
- Interféromètre de Michelson
 - Présentation du dispositif
 - Configuration en lame d'air
 - Configuration en coin d'air
- Fabry Pérot

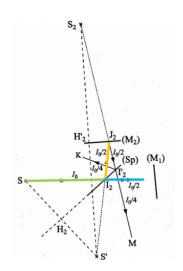

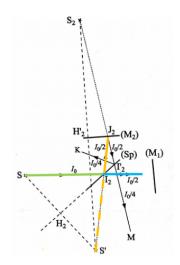

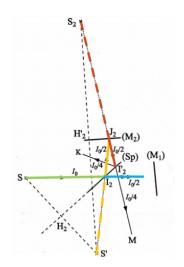

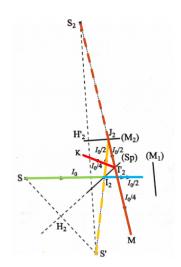

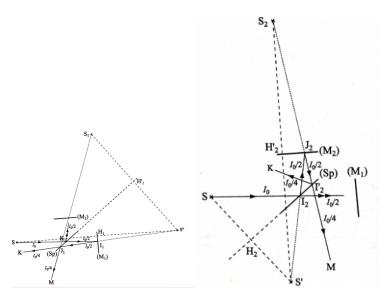

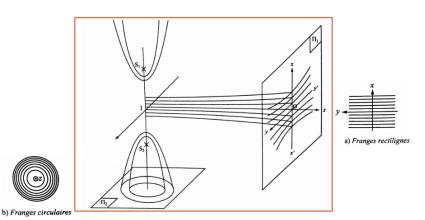

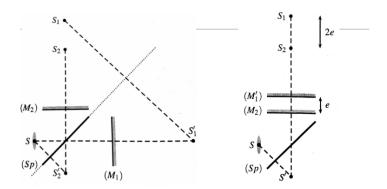

Configuration en lame d'air

Configuration en coin d'air
